Water supply in slums and colonies in NCT of Delhi

2765. SHRI E. M. SUDARSANA NATCHIAPPAN: Will the Minister of URBAN DEVELOPMENT be pleased to state:

(a) whether it is a fact that basic infrastructure of water supply is not available in various slum and small colonies in the NCT of Delhi and people are forced to take impure and disease-prone water; and

(b) if so, what steps are being taken by Government to provide potable water in these areas?

THE MINISTER OF URBAN DEVELOPMENT (SHRI GHULAM NABI AZAD): (a) and (b) Slum & JJ Department of Municipal Corporation of Delhi has reported that infrastructure for water supply is available in all the resettlement pockets developed by them.

Delhi Jal Board (DJB) has reported that mostly water supply in slum colonies is through public water hydrants, Deep Bore Hand Pumps (DBHPs) and Tube wells. In case of shortage of water, the same is supplemented by supplying drinking water through tankers. Regular sampling is done by DJB to ensure the quality of water.
